

Exploring where I live!

For the next two weeks you have a geography mini-topic. Choose as many activities from the menu below as you would like to do over the next two weeks!

Model village

Create a model of where you live in a shoe box. Think about all the buildings and places you can go. You might include in your model village: shops, houses, churches, schools, parks, etc.

Learn a new song!

Learn a new song all about the world. It could be a song about the different continents or the different countries in the world! (There are lots on youtube) Once you have learnt it, send your teachers a video!

Fantastic facts

Use google to find out 5 facts that are interesting about the place you live. It might be how old a building is or how many people live there. Ask your grown up to help you write them down as a mind map.

London Landmarks

Have you ever been to London? If so, you will know all about the big landmarks like the Big Ben or the London Eye. Google the landmarks and create either a picture or a model of one of them.

Birds eye view!

Imagine you are a bird flying over the place you live – what can you see down below? Draw what you see when you are flying around! I can see a long road, a church and some houses on my journey!

Terri-fic tour guide!

Imagine you are a tour guide, showing people around the place you live. Go on a trip around your town or village and ask your grown up to record you telling them about the places you see. For example "On your left is the school that I go to!"
